WORK EXPERIENCE

NetJets
Columbus OH
Sept 2015 – Dec 2019
Agile Manual Quality Assurance Analyst and Business Analyst Contractor

- The project that I was involved in at NetJets was the Global International Trip Planning Project in which myself and my team had to create a web based application that managed data and used a workflow tool to help users identify and complete several tasks needed to plan an international trip.

- As the teams Manual Quality Assurance Analyst my responsbilities were as follows:
    - writing and linking a manual test script for each new story card from JIRA in Zephyr
    - creating,maintaining and updating a regression test suite with over 300 manual tests
    - executing regression testing quarterly
    - facilitating defect triage
    - finding then creating and tracking defects in Zephyr.

- As the teams Business Analyst my responsbilities were as follows:

    - Facilitating Meetings for Sprint Planning, Requirement Gathering, Backlog Grooming, User Acceptance Testing and Retrospectives.
    - Writing User Stories and Requirements in JIRA.
    - Requirements elicitation, analysis, documentation, and communication for large and/or complex technology projects utilizing an Agile development methodology
    - Business process mapping and reengineering
    - Liaison between IT and business partners, with a focus on flight operations, scheduling, international trip planning, crew resource planning, and safety

State Auto Insurance
